DETAILED ACTION

Response to Amendment

The Amendment, filed on 12/02/2003, has been entered and acknowledged by the Examiner.

Election/Restrictions

This application is in condition for allowance except for the presence of claims 14 to 24 non-elected without traverse. Accordingly, claims 14-24 have been cancelled.

Allowable Subject Matter

Claims 8-13 are allowed.

Regarding claim 8, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 8, and specifically comprising the limitation of a flat lamp where the electrodes are formed in grooves on the two substrates facing each other and the electrodes are formed with a width that is smaller than the width of the groove leaving a gap between the electrodes and the substrate wall. The closest available prior art is Choi et al. (US 6,005,345) which appears to show electrodes that are smaller than the grooves, however in this case the grooves represent the entire base of the discharge cell which would negate one of the primary of being able to advantageously limit the electrode size. Further no additional motivation to include the space is given in Choi or is readily evident to the examiner from the prior art.

Regarding claims 9 and 10, claims 9 and 10 are allowable for the reasons given in claim 8 because of their dependency status from claim 8.

Art Unit: 2879

Regarding claim 11, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 11, and specifically comprising the limitation of a flat lamp where the electrodes are formed in grooves on the bottom substrate and the electrodes are formed with a width that is smaller than the width of the groove leaving gaps between the electrodes and substrate walls. The closest available prior art is Choi et al. (US 6,005,345) which appears to show electrodes that are smaller than the grooves, however in this case the grooves represent the entire base of the discharge cell which would negate one of the primary advantages of being able to advantageously limit the electrode size. Further no additional motivation to include the space is given in Choi or is readily evident to the examiner from the prior art.

Regarding claims 12 and 13, claims 12 and 13 are allowable for the reasons given in claim 11 because of their dependency status from claim 11.
